

IN THE ABSTRACT OF THE DISCLOSURE:

Please amend the Abstract of the Disclosure to read as follows:

The invention is related to a data transmission method in a telecommunication system. The method comprises determining (202) the number of bit rate classes, setting (204) bit rates for the bit rate classes, setting (206) a maximum transmission power target, arranging (208) resource requests into a queue, allocating (210) resources according to the requests in the queue until the maximum power target is achieved.
